

The Office of Institutional Research and Strategy (IRS) are dedicated to meeting the data, information, and analytical, planning and strategic needs of Abu Dhabi University. IRS is broadly divided into strategy development and deployment, research and analysis, and quality control. In conjunction with higher management, IRS assists in the development of strategic plans, goals and objectives, in achieving ADU's vision.

Strategic deployment is responsible for facilitating the implementation of strategy through the university balanced scorecard system.

IRS is the central standardized data warehouse for all information pertaining to students, staff and faculty. It is responsible for periodical reporting and tracking data trends. IRS also provides management with research and analysis tools required to launch and assess ADU's new and existing programs.
